HORIZON WEST

MAINTENANCE POLICY (HVA)

The HWLC Maintenance Management program is structured on, and adheres to, the requirements of Main Roads WA HVA Accreditation and the NHVAS scheme.

This includes:

- a start-up procedure,
- daily vehicle check,
- planned services,
- regular roadworthiness inspections and
- effective fault reporting and rectification.

In order to provide a safe operation of heavy vehicles, we understand, and are committed to maintaining a safe, reliable and roadworthy vehicle through a properly planned and executed maintenance program in accordance with Western Australian Heavy Vehicle Accreditation (HVA).

Additionally, we will only use vehicles belonging to others that are accredited vehicles covered by a Maintenance System meeting Western Australian Accreditation requirements.

The procedures outlined in this manual are a true account of HWLC maintenance practices.

Non-conformance reports (NCR) for this system are to be recorded in the HW Action Tracking database.
